

Assignment 1 (Data Analytics Process)

Your task is to give the example(s) of such a real-life situation where we use Data Analytics and link it with the data analytics process. You can prepare a PPT/PDF on a real-life scenario explaining it with the above process (Plan, Prepare, Process, Analyze, Share, Act) and submit it as part of this task.

PLAN: We first decide what thing to buy. Like if I want to buy a set of cloths for my farewell. I will decide what to buy . like I want to buy a suit for myself to ware in farewell.

PREPARE: Now I will prepare from which shop I m going to buy the item . As I will not go to any Grocery store I will deffinetly go to a textile shop to buy a suit. And also find from where the money if the suit will come . like if the money will be given by mother or father or I will pay the amount from card .

PROCESS: Now I will dress up myself and then take up card or money from where I want to pay for the suit. And then procide toward the market by vehicle or local bus.

ANALYZE: Now will analyze which shop to go and what quality of suit I want to buy . I will go to different shops and find the perfect design and color suits me .

SHARE : Now I will communicate with the shopkeeper about the design and the money.

ACT: now the final step I will pay the bill and then take the suit which I have brought.
